

## A Tangled Tale

## Lewis Carroll

A Tangled Tale

Lewis Carroll (1832 - 1896) is famous for Alice's Adventures in Wonderland. It is less widely known that he worked as a lecturer for mathematics at Christ Church college, Oxford for 27 years. A Tangled Tale merges his two talents as storyteller and mathematician. It consists of 10 short humorous stories which present one or more mathematical problems. The 10 'knots' as they are called, were first published in 'The Monthly Packet' magazine between April 1880 and March 1885, where readers were invited to solve the problems, and the solutions were discussed in a later issue.

Lewis Carroll

Chapters 1 - 10: Knots I - X

Total running time: 3:18:33

Chapters 11 - 20: Answers to Knots I - X
